Journal of MOLECULAR GRAPHICS

VOLUME 12, 1994

AUTHOR/TITLE INDEX

Alkorta, I., Perez, J. J. and Villar, H. O. Molecular polarization maps as a tool for studies of intermolecular interactions and chemical reactivity, 3
Amisaki, T., Fujiwara, T. and Kobayashi, S. A molecular dynamics study of branched α-cyclodextrin, 297
Anchin, J. M., Mandal, C., Culberson, C., Subramaniam, S. and Linthicum, D. S. Computer-aided molecular modelling of the binding site architecture for eight monoclonal antibodies that bind a high potency guanidinium sweetener, 257
Atkinson, T.: *See* Duffield, M. L., 14

Badel-Chagnon, A., Nessi, J., Buffat, L. and Hazout, S. "Iso-depth contour map" of a molecular surface, 162
Baerends, E. J.: *See* Nederkoorn, P. H. J., 242
Boscott, P. E. and Grant, G. H. Modeling cytochrome P450 14α demethylase (*Candida albicans*) from P450cam, 185
Boyle, A. Polymer chain packing analysis using molecular modeling, 219
Brasseur, R.: *See* Rahman, M., 212
Brickmann, J.: *See* Teschner, M., 98
Brickmann, J.: *See* Heiden, W., 106
Brickmann, J. The Darmstadt workshop on molecular modeling: Past and future, 82
Buffat, L.: *See* Badel-Chagnon, A., 162

Carson, M. and Yang, Z. DNurbs: DNA modeled with NURBS, 178
Casher, O., Green, S. M. and Rzepa, H. S. EyeChem 1.0: A modular chemistry toolkit for collaborative molecular visualization, 226
Cioslowski, J.: *See* Nanayakkara, A., 38
Cruciani, G. and Goodford, P. J. A search for specificity in DNA-drug interactions, 116
Culberson, C.: *See* Anchin, J. M., 257

Dion, A. S. Personal computer-based visualization of molecular models by available ray-tracing software, 41
Dolata, D. P.: *See* Walters, W. P., 130
Donne-Op den Kelder, G. M.: *See* Nederkoorn, P. H. J., 242
Duffield, M. L., Nicholls, D. J., Atkinson, T. and Scawen, M. D. An investigation of the thermal stabilities of two malate dehydrogenases by comparison of their three-dimensional structures, 14

Engels, M.: *See* Schlitter, J., 84
Ewart, J. F., Kirby, G. H. and Rayner, J. D. Visualization of the relationship between Fischer and Haworth projections of monosaccharides by animation on a microcomputer, 153

Fincham, D. Dynamic simulation of molecular and ionic materials, 29
Fiser, A., Tusnady, G. E. and Simon, I. Chaos game representation of protein structures, 302
Fujiwara, T.: *See* Amisaki, T., 297
Fujii, I.: *See* Teraishi, K., 282

Gaber, B. P.: *See* Light, W. R., 172
Gadre, S. R. and Taspa, A. Graphics visualization of molecular surfaces, 45
Gaspin, C.: *See* Massire, C., 201
Gasteiger, J., Li, X. and Uschold, A. The beauty of molecular surfaces as revealed by self-organizing neural networks, 90
Goodford, P. J.: *See* Cruciani, G., 116
Grant, G. H.: *See* Boscott, P. E., 185
Green, S. M.: *See* Casher, O., 226
Grice, M. E., Murray, J. S. and Politzer, P. Calculated surface electrostatic potentials of molecular sieve models containing SiO_4, AlO_4 and PO_4 units, 169

Hazout, S.: *See* Badel-Chagnon, A., 162
Heiden, W. and Brickmann, J. Segmentation of protein surfaces using fuzzy logic, 106
Henn, C.: *See* Teschner, M., 98

Islam, S. A.: *See* Weaver, T. D., 231

Kachalova, G. S.: *See* Kisljuk, O. S., 305
Kaufman, J. J.: *See* Roszak, S., 207
Kirby, G. H.: *See* Ewart, J. F., 153
Kisljuk, O. S., Kachalova, G. S. and Lanina, N. P. An algorithm to find channels and cavities within protein crystals, 305
Kobayashi, S.: *See* Amisaki, T., 297
Kruger, P.: *See* Schlitter, J., 84

Lanina, N. P.: *See* Kisljuk, O. S., 305
Li, X.: *See* Gasteiger, J., 90
Light, W. R. and Gaber, B. P. NanoVision—molecular graphics for the Macintosh, 172
Linthicum, D. S.: *See* Anchin, J. M., 257
Lowrey, A. H.: *See* Roszak, S., 207

Mahmoudian, M. The complex of human Gs protein with the beta3 adrenergic receptor: A computer-aided molecular modeling study, 22
Mandal, C.: *See* Anchin, J. M., 257
Martin, M.: *See* Rozas, I., 267
Massire, C., Gaspin, C. and Westhof, E. DRAWNA: A program for drawing schematic views of nucleic acids, 201
Miller, J.: *See* Silver, D., 139
Murray, J. S.: *See* Grice, M. E., 169

Nakamura, H.: *See* Teraishi, K., 282
Nanayakkara, A. and Cioslowski, J. RhoScope: A highly portable computer program for visualization of the zero-flux atomic surfaces, 38
Nederkoorn, P. H. J., Vernooijs, P., Donne-Op den Kelder, G. M., Baerends, E. J. and Timmerman, H. A new model for the agonistic binding site on the histamine H2-receptor: The catalytic triad in serine proteases as a model for the binding site of histamine H2-receptor agonists, 242
Nessi, J.: *See* Badel-Chagnon, A., 162
Nicholls, D. J.: *See* Duffield, M. L., 14

O'Malley, P. J. The use of molecular graphics and quantum mechanical derived electrostatic potentials to visualize Brönsted acid site strength in zeolites, 286

Perez, J. J.: *See* Alkorta, I., 3
Politzer, P.: *See* Grice, M. E., 169

Rahman, M. and Brasseur, R. WinMGM: A fast CPK molecular graphics program for analyzing molecular structure, 212
Rayner, J. D.: *See* Ewart, J. F., 153
Reiling, S.: *See* Teschner, M., 98
Roszak, S., Lowrey, A. H., Sokalski, W. A. and Kaufman, J. J. Usefulness of one electron properties in the study of the nitromethane-to-methyl nitrite rearrangement, 207
Rozas, I. and Martin, M. Effect of branching in 4-alkylpryazoles on liver alcohol dehydrogenase inhibition. A shape analysis study, 267
Rzepa, H. S.: *See* Casher, O., 226

Saito, M.: *See* Teraishi, K., 282
Scawen, M. D.: *See* Duffield, M. L., 14
Schlitter, J., Engels, M. and Kruger, P. Targeted molecular dynamics: A new approach for searching pathways of conformational transitions, 84
Silver, D. and Miller, J. Visualizing collagen fibril growth, 139
Simon, I.: *See* Fiser, A., 302
Sokalski, W. A.: *See* Roszak, S., 207

KEYWORDS INDEX

Ab initio molecular orbital, 282, 286
Acidity, 286
Activation mechanism, 242
Adrenergic receptor, 22
Agonistic binding site, 242
Aldol, 282
Animation, 153
Artificial intelligence, 130
Atoms in molecules, 38
Automatic segmentation, 106

B-spline, 201

Candida albicans, 185
Canonical structures, 257
Catalytic antibody, 282
Cavities, 305
Cell parameters, 219
Chain packing, 219
Channel, 305
Chaos game representation, 302
Charge, 282
Collagen fibrils, 139
COMFA, 116
Computer graphics, 139
Computer modeling, 22
Conformational, 84
Conformational analysis, 130
Conformational transition, 84
Contour map, 162
CPK modeling, 212
Crambin, 162
Cumulative atomic multipole moments (CAMM), 207
Cyclodextrin, 297

Dataflow toolkits, 275
Deletion model Topiol, 242
Demethylase, 185
Depth buffer algorithm, 212
DNA, 116, 178
Drug interactions, 116

Electron density, 38
Electron density surface, 286
Electronic excited states, 207
Electrostatic potential, 90, 106, 207, 286
Electrostatic potentials, 169
Ewald sum, 29
Explorer, 226
EyeChem, 226

FDDI, 226
Fischer projection, 153
Fractal geometry, 302
Fuzzy logic, 106

G protein, 22
GL, 201
GRID, 116
GROMOS, 297
Guanidinium chloride unfolding, 14

Hapten, 282
Haworth projection, 153
Histamine H_2-receptor, 242
Homology modeling, 185
H_2-agonist, 242
Hydrogen bond, 297

Insulin, 84
Interaction maps, 3
Interaction method (MRD-CI), 207
Interactive application, 212
Intramolecular hydrogen bond, 242
IRIS explorer, 275
Iso-depth curves, 162

Kinemage file, 231

LADH inhibitor, 267
Learning, 130
Ligands, 257
Local lipophilicity, 106

Macintosh, 172
Macintosh computer, 231
MD simulation, 84
MEP, 242
